

🎮 GamesLibri

Discover Amazing Free Games

Live Demo

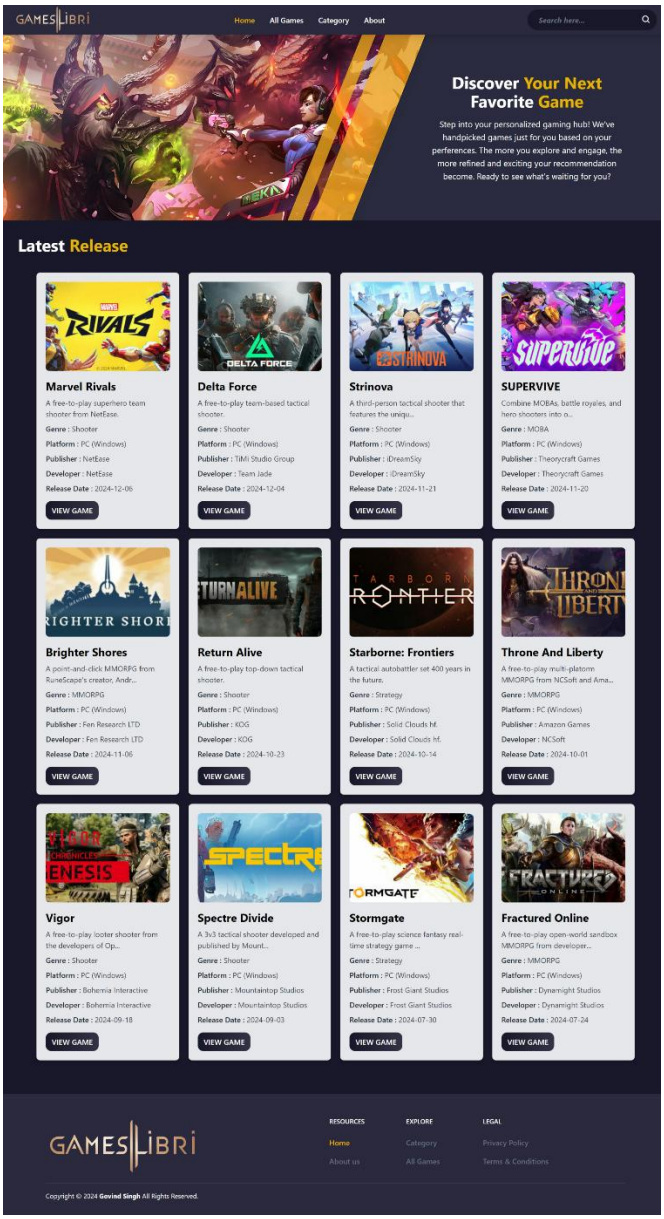

📖 About

GamesLibri is a modern, responsive web application built with React that helps gaming enthusiasts discover and explore an extensive collection of free-to-play games. With an intuitive interface and powerful search capabilities, users can easily browse games by categories, search for specific titles, and find detailed information about each game.

✨ Features

- 🎯 **Comprehensive Game Discovery** - Browse thousands of free games from various genres
- 🔍 **Advanced Search & Filtering** - Find games by title, genre, or category
- 📱 **Responsive Design** - Seamless experience across desktop and mobile devices
- 🏷️ **Category Navigation** - Explore games organized by genres
- ⚡ **Fast Performance** - Built with Vite for lightning-fast load times
- 🎨 **Modern UI/UX** - Clean and intuitive interface with Tailwind CSS
- 🔗 **Direct Game Links** - Quick access to play games on their platforms

Screenshots

Quick Start

Prerequisites

- **Node.js** (v16 or higher) - Download here
- **npm** or **yarn** package manager

Installation

1. **Clone the repository**

   ```
   git clone https://github.com/GovindSingh3011/GamesLibri.git
   cd GamesLibri
   ```

2. **Install dependencies**

   ```
   npm install
   # or
   yarn install
   ```

3. **Start the development server**

   ```
   npm run dev
   # or
   yarn dev
   ```

4. **Open your browser**

   Navigate to `http://localhost:5173` to view the application

Build for Production

```
npm run build
```

This creates an optimized production build in the `dist` directory.

🛠️ Tech Stack

Technology	Version	Purpose
React	18.3.1	Frontend framework
Vite	6.0.5	Build tool and dev server
React Router	7.1.1	Client-side routing
Tailwind CSS	3.4.17	Utility-first CSS framework
Axios	1.7.9	HTTP client for API requests
Styled Components	6.1.14	CSS-in-JS styling

Project Structure

Available Scripts

Command	Description
`npm run dev`	Start development server
`npm run build`	Build for production
`npm run preview`	Preview production build
`npm run lint`	Run ESLint for code quality

API Integration

GamesLibri integrates with the Free-to-Play Games Database API to fetch real-time game data, including:

- Game titles and descriptions
- Genre classifications
- Screenshots and thumbnails
- Platform availability
- Release dates

🤝 Contributing

Contributions are welcome! Please feel free to submit a Pull Request. For major changes, please open an issue first to discuss what you would like to change.

1. Fork the project
2. Create your feature branch (`git checkout -b feature/AmazingFeature`)
3. Commit your changes (`git commit -m 'Add some AmazingFeature'`)
4. Push to the branch (`git push origin feature/AmazingFeature`)
5. Open a Pull Request
